EDUCATION

System Plus Computer College – Caloocan

*Bachelor of Science in Information Technology, **Magna Cum Laude***

Caloocan, Philippines

2022 – 2026

PROFESSIONAL EXPERIENCE

Part-Time Database Developer — LISAI

2026 – Present

- Design, develop, and maintain relational database systems and production schemas.
- Optimize complex queries and enforce data integrity, security controls, and system performance benchmarks.
- Collaborate with cross-functional teams on data architecture layouts and custom reporting solutions.

Head Developer / Assistant Developer — SPCC IT Department (ITSA)

Sep 2022 – Apr 2025

- Built a secure voting web application for the Information Technology Students Association.
- Engineered an automated attendance tracking application deployed at campus ITSA events.

Freelance Web Developer — SG Stainless Steel & MMPZN

Jan 2022 – May 2022

- Designed and launched two responsive static web platforms for small business clients.
- Engaged directly with stakeholders to map technical requirements to brand identities.

TECHNICAL PROJECTS

ALAMS – Automated Logbook Attendance Monitoring System

- Developed a kiosk-style mobile attendance app with on-device face recognition (FaceNet TFLite) and active liveness detection via Google ML Kit and passive anti-spoofing (MiniFASNet/NCNN/JNI).
- Implemented offline-first architecture using SQLite with real-time Supabase cloud synchronization and PBKDF2-hashed admin authentication with brute-force lockout.

SIBOL – IoT Crop Monitoring System

- Deployed an IoT crop management solution using Python and YOLOv11 for real-time agricultural object detection, with a React frontend backed by a Laravel REST API.

Sentry – Biometric Attendance Monitoring System

- Built an attendance platform using FaceNet and Google ML Kit with anti-spoofing (blinking detection) and a dynamic online/offline Supabase synchronization layer.

ARS – Airplane Reservation System

- Architected a Laravel-powered flight booking system with role-based access (Passenger, Staff, Admin), Stripe payment integration, and an interactive visual seating chart.

TaskFlow – Project Management System

- Built a Jira-style Kanban app with drag-and-drop task transitions and Google OAuth authentication; deployed on Render.com with Docker and Aiven-hosted MySQL.

TECHNICAL SKILLS

Languages & Frameworks: PHP (Laravel), JavaScript (React), Python, HTML/CSS, Flutter/Dart, C++

Databases & Cloud: MySQL, SQLite, Supabase, Microsoft Access/VBA, ODBC, Relational Schema Design

AI & Computer Vision: FaceNet TFLite, Google ML Kit, MiniFASNet, YOLOv11

Tools & Platforms: Git, Docker, Render.com, Aiven, VS Code

Core Competencies: Full Stack Development, Data Architecture, Responsive Design, Critical Thinking

CERTIFICATIONS

Microsoft Office Specialist: Excel Associate (Office 2019) — *Microsoft, 2022*
